

SANUVOX

Extend shelf-life & deliver exceptional quality

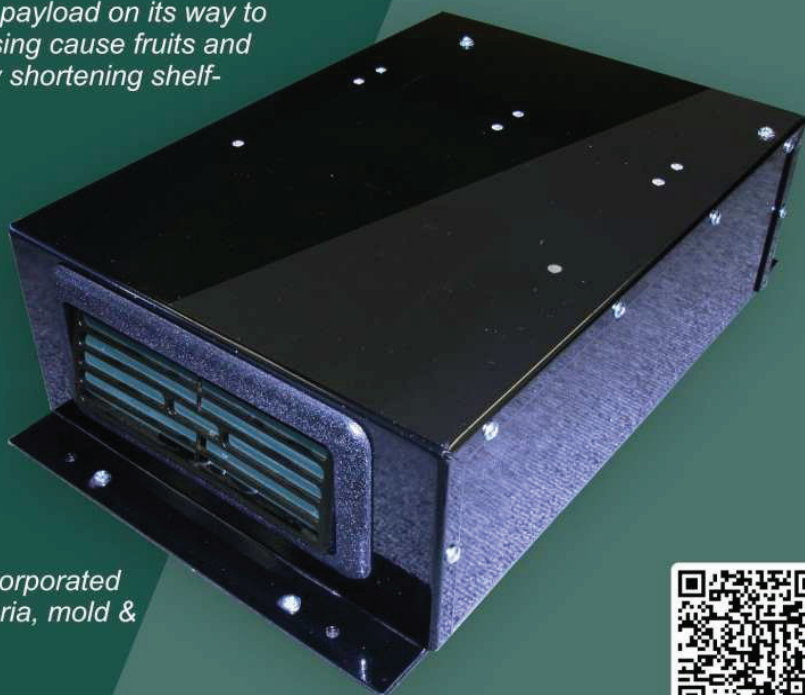

Mold and bacteria can severely impact the delicate payload on its way to storage facilities and retail stores. Ethylene off-gassing cause fruits and vegetables to prematurely ripen & age dramatically shortening shelf-life.

Sanuvox Technologies offers an exceptional cost-effective mobile air treatment solution that easily incorporates into any truck or trailer designed to destroy airborne bio-chemical contaminants including bacteria, mold and ethylene off-gassing.

Interceptor Mobile Air Treatment

Features

- 12V operation
- Small 11" x 15" footprint can be mounted in any location within the trailer
- Proprietary Sanuvox UV sterilization process incorporated into a mobile sterilizer designed to destroy bacteria, mold & ethylene off-gassing
