

Asbestos Senior Consultant and Laboratory Manager / Occupational Hygienist

We are currently looking for one **full time** team member as a consultant / manager for our asbestos / occupational hygiene division in our Brisbane office.

About the Business

Opira is a leading indoor air quality and consulting business based in Mansfield, Brisbane with offices in Sydney, Melbourne and Perth. For more information, please visit our website: www.opira.com.au

About the Role

To continue to grow and enhance our already established NATA certified asbestos testing laboratory and then train other team members how to perform the work as the department grows.

Continue to provide quality testing and consulting services for a range of hazardous materials such as Asbestos, Chemicals, Methamphetamine, and Mould. Indoor Environmental testing and Consulting and preparation of technical reports based on the data gathered is a key component of the role. Also working as part of a team in the remediation of hazardous environments.

Key clients, include government, hospitals, universities, laboratories, shopping centres, commercial buildings, industrial sites and insurance assessments and clearances. There would also be opportunities to work with our NATA accredited laboratory for critical environment testing.

Formal Qualifications / Requirements

There are some specific skills required as this opportunity requires you to work with the board to grow this environmental division into a national presence. In order to perform this role we require individuals who have the following:

- A degree in Science, Engineering or Environmental Health/Occ hygiene
- Licensed Asbestos Assessor (LAA) or ability to obtain
- Approved Asbestos Identifier – Satisfactory Proficiency Testing Australia (PTA) results for Bulk, Soils and air.
- Experience in managing projects for asbestos inspections and/or asbestos management plans and audits.
- NATA Fibre Counting Accreditation – Satisfactory PTA results for Fibre Counting
- 2+ Years experience in occupational hygiene or asbestos consulting role in performing a similar role and / or a background in occupational hygiene, asbestos, laboratory work
- Knowledge of NABERS, WELL, GREENSTAR and other building standards
- Familiarity with requirements of ISO9001 quality systems and ISO45001 OH&S
- Valid Driver's Licence
- Construction White Card
- Indoor Air Quality testing consulting and reporting
- Mould assessments and reporting
- Business development and sales skills to help grow the business
- Excellent written and verbal communication skills

In return we offer.

- Generous salary package commensurate with matching of the above requirements and level of experience
- Included is either a company vehicle or vehicle allowance with a generous bonus structure reward available for the successful applicant

- Fully funded memberships to relevant industry associations and ongoing professional development on offer to the successful applicant

If this sounds like you, we want to hear from you, so please send your resume and cover letter to scott@opira.com.au
